Experience

Sep | 2021

RedSoft Solutions – *Software Engineer*

- Working on a cutting-edge NFT-Marketplace using blockchain technology, using ethers.js and ImmutableX.
- Developed Metaverse scenes and customized avatars on multiple platforms like Decentraland, Sandbox, and Roblox Studio.
- Contributed to a File Management Project as a Junior Developer and learned new technologies such as Next.js, Nest.js, MongoDB, and Node.js.
- As part of my training, I successfully built a Claims Management Solution with a tech stack that included HTML, CSS, TypeScript, React, Styled Components, Antd Designs, Firebase Authentication, and Firestore Database.
  - Implemented an Authentication Flow, created custom components, added field validations, developed a Dashboard Page, and implemented full CRUD Operations Using Firestore.
  - Demo

June-Aug | 2021

RapidEra Technologies, Pune – *Frontend–Developer Intern*

- Developed UI Screens, fixed frontend issues,
- Integrated Google Analytics with React-GA library to gain insights into user behavior.
- Certificate
